Abstract: This investigation was carried out between 1994 and 1997 in order to contribute to knowledge on Artvin's flora. The Artvin area reflects the eastern part of the Black Sea region's rich floristic composition. The research area under review is in the Colchic province of the Euro-Siberian floristic area in the Holarctic region and is found in the A8 square according to grid system of Davis. In the studied area, 769 taxa belonging to 374 genera and 95 families were determined. Of the 769 taxa, 26 *Pteridophytes* and 743 *Spermatophytes* were detected. *Spermatophytes* also contained 10 *Gymnospermae* and 733 *Angiospermae* taxa. The largest five families are *Compositae* with 73 taxa (9.5%), *Leguminosae* with 67 taxa (8.7%), *Rosaceae* with 50 taxa (6.5%), *Cruciferae* with 49 taxa (6.4%) and *Labiatae* with 42 taxa (5.5%). The largest genus is *Trifolium* L. (14 taxa) and the second is *Astragalus* L. (13 taxa). The distribution of the taxa according to the phytogeographical regions was as follows: 35.6% Euro-Siberian, 6.9% Irano-Turanian, 2.2% Mediterranean and 55.3% unknown. Endemism is 7.4% and included 57 endemic taxa.

Key Words: Flora, National Park, Hatila Valley, Artvin.

Hatila Vadisi Milli Parkı ve Yakın Çevresinin Florası (Artvin)

Özet: Bu çalışma, 1994-1997 yılları arasında, Doğu Karadeniz Bölgesinin kuzeyinde, oldukça zengin floristik içeriğe sahip Artvin'in florasına katkıda bulunmak amacıyla gerçekleştirilmiştir. Araştırma alanı, Davis tarafından uygulanan grid sistemine göre A8 karesinde yer almakta olup, Holarktık fitocoğrafik bölgenin, Avrupa-Sibirya flora alanının Kolşik kesimde yer almaktadır. Araştırma sonuçlarına göre; 95 familya ve 374 cinsle ilişkin toplam 769 takson kaydedilmiştir. Bu taksonların 26'sı *Pteridophyta*, 743'ü *Spermatophyta* bölümüne ilişkindir. *Spermatophyta* bölümünde, 10 takson *Gymnospermae* ve 733 takson *Angiospermae*'dir. Araştırma alanında en fazla türe sahip beş familya sırasıyla *Compositae* 73 takson (% 9.5), *Leguminosae* 67 takson (% 8.7), *Rosaceae* 50 takson (% 6.5), *Cruciferae* 49 takson (% 6.4) ve *Labiatae* 42 takson (% 5.5). En büyük cins *Trifolium* L. (14 takson), ikincisi ise *Astragalus* L. (13 takson)'tur. Taksonların, fitocoğrafik bölgelere göre dağılımları ise şöyledir: Avrupa-Sibirya % 35.6, İran-Turan % 6.9, Akdeniz % 2.2 ve orijini bilinmeyenler % 55.3'tür. Taksonların 57 adeti (% 7.4) endemiktir.

Anahtar Sözcükler: Flora, Milli Park, Hatila Vadisi, Artvin.

Introduction

The aim of this study was to contribute to knowledge about Artvin's flora, as this area reflects the eastern part of the Black Sea region's rich floristic composition.

In nearby areas, some floristic and vegetation studies were carried out by Anşin (1979, 1983, 1984), Düzenli (1988), Vural (1996), and Küçük (1998).

The study area is in the A8 square according to Davis (1971)'s grid system and within the Colchic province of

the Euro-Siberian floristic area in the Holarctic region (Zohary, 1973). The altitude of the area is between 170 and 3224 m. The area under review has a length of 24.4 km and extends from the Çoruh River (170 m) to Mount Kurt (3224 m) and has a width of 14.3 km from Alacadağ (2844 m) to Mount Keçi (2047 m). The study area includes a sharp valley water catchment area that has about 3000 m elevation differences. The area is situated between lat 41°3'-41°13'30" N and long 41°31'-41°48' E and is some 25 000 ha in area (Figure 1).

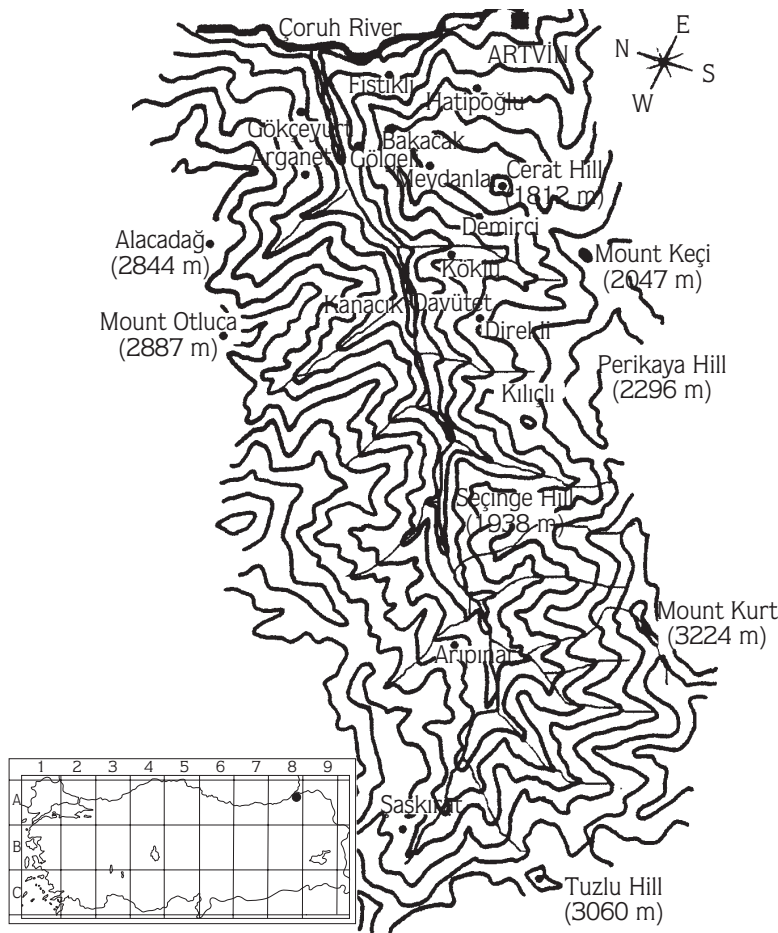

Figure 1. Topographical map of the study area.

Climatological data were obtained from Artvin Meteorological station. The annual average rainfall is 661.03 mm and the average warmth is 12.3 °C in the area (Meteoroloji Bülteni, 1995). The climate type of the area is semi-humid and the main vegetation type of the area is humid forest (Çepel, 1966). The rainfall regime of the study area is “winter-spring-autumn-summer” (Central Mediterranean) of Mediterranean origin. The region is in line with the rainfall-heat formula ($Q = 89.4$) and a low precipitation/cold bioclimate type is dominant (Akman, 1999).

Upper Cretaceous aged volcanic blocks (basalt, gabbro and peritoneum) form the main geologic structure. There are seven large soil groups in the study area, namely, brown forest soils, noncalcareous brown forest soils, chestnut soils, alluvial soils, colluvial soils, red-yellow podzolic soils and high mountain meadow soils. The most widespread is the brown forest soils type (Topraksu Genel Müdürlüğü, 1975).

Materials and Methods

The materials of this study included some 2000 plant samples collected from the research area between 1994 and 1997. Efforts were made to collect both flowering and fruiting specimens. The plant samples were prepared according to established herbarium techniques. The Flora of Turkey (Davis, 1965-85; Davis et al., 1988) and other sources (Komarov, 1934-60; Grosheim, 1939-1967) were utilised in the identification of the plant samples. This identification was carried out in the Herbarium of the Forestry Faculty, Black Sea Technical University, Trabzon (KATO) and ISTO (İstanbul) herbarium. All plant samples were kept in KATO.

The list of plants is presented according to the sequence given in the Flora of Turkey (Davis, 1965-85). The taxa we were unable to collect during this study but were cited in the Flora of Turkey were added to the floristic list. Since the research area was wholly situated within the A8 grid square, this information was not

repeated after the taxa names. After the name of every species in the floristic list, the geographical location, habitat of plant, altitude, collection date, collector name and number, endemism, IUCN threat categories, and phytogeographical region are given. Author abbreviations of plant names are given according to Brummitt and Powell (1992). Since 19 taxa defined as new records for the A8 square in this manuscript were published before (Anşin et al., 1997), only the names of these 19 taxa are given in this study. The endemic and rare non-endemic plants in the study area have been classified according to IUCN threat categories (Ekim et al., 2000).

Abbreviations

The abbreviations used in the text and in the floristic list are as follows: Cosm: Cosmopolitan, DD: Data Deficient, E.: East, EN: Endangered, Euro-Sib: Euro-Siberian element, Eux.: Euxine element, Hyr-Eux: Hyrcano-Euxine element, Ir-Tur: Irano-Turanian element, LR: Lower Risk, (lc: least concern, cd: conservation dependent, nt: near threatened), m: metre, Medit.: Mediterranean element, mt: mountain, ÖE: Özgür Eminağaoğlu, and VU: Vulnerable.

Results and Discussion

In this study, a total of 769 taxa from 87 families and 324 genera were identified. Twenty-six of them belonged to *Pteridophyta*, and the remaining 743 taxa were *Spermatophyta*, which included 10 taxa from the

Gymnospermae and 733 taxa from the *Angiospermae*. The *Angiospermae* also included 644 taxa from the *Magnoliopsida* and 89 taxa from the *Liliopsida*. The dispersion of the plant taxa that were defined in the study area according to the large taxonomical groups is shown in Table 1.

After the identification of all taxa, the phytogeographical distributions of 344 taxa were determined. The percentage of phytogeographical origins of 344 taxa was 274 (35.6%) Euro-Siberian, 53 (6.9%) Irano-Turanian, and 17 (2.2%) Mediterranean. Twenty-nine taxa are cosmopolitan (3.8%). The rest of the 396 taxa (51.5%) are either multi-area elements or single elements which have not yet been accepted as members of the phytogeographical area (Table 2).

Euro-Siberian elements were higher in ratio when the phytogeographical distribution of taxa was compared with the other elements in the study area. The abundance of Euro-Siberian elements (35.6%) and widespread presence of taxa such as *Picea orientalis* (L.) Link, *Abies nordmanniana* (Stev.) Spach. subsp. *nordmanniana*, *Pinus sylvestris* L. (*Pinaceae*), and *Alnus glutinosa* (L.) Gaertn subsp. *barbata* (C.A.Mey.) Yalt. (*Betulaceae*) can be attributed to the high influence of the Colchic province in the study area. However, the contribution of the Irano-Turanian (6.9%) and Mediterranean (2.2%) elements to the flora of the area cannot be overlooked. As seen in Table 2, the results of our study area were in agreement with those of neighboring areas because it is in the same phytogeographical region. The percentage of

Table 1. The dispersion of taxa according to the large taxonomical groups.

	Number of Families	Number of Genera	Number of Taxa
<i>Pteridophyta</i>	12	15	26
<i>Gymnospermae</i>	4	6	10
<i>Dicotyledones</i>	71	305	644
<i>Monocotyledones</i>	8	48	89
Total	95	374	769

Table 2. Distribution of species in phytogeographical regions and comparison with studies carried out in nearby areas.

	Number of taxa (%)				
	Euro-Sib.	Ir-Tur.	Medit.	Cosm.	Pluriregional
Present study	35.6	6.9	2.2	3.8	51.5
Küçük (1998)	34.4	7.9	1.1	1.6	55.0
Düzenli (1988)	50.5	7.5	5.0	1.0	36.0

Mediterranean elements in our study was higher than that stated by Küçük (1998). A possible explanation is that our study area is under the influence of the Mediterranean climate and a local Mediterranean climate occurs in some areas close to the Black Sea region. The flora of the study area mainly resembles Caucasian flora, but it also shares similarities with Japanese and North American flora.

A comparison of families in terms of the largest number of species found in this study and to previous studies carried out in nearby regions is given in Table 3. As seen in Table 3, the results of this article were also in agreement with the other similar studies. Differences in several taxa might be derived from the results of dissimilarities in climate and habitat.

The largest families in terms of number of genera are *Compositae* (39), *Cruciferae* (26), *Gramineae* (23), *Rosaceae* (22), *Leguminosae* (19), *Labiatae* (19), *Boraginaceae* (15), *Ranunculaceae* (14), *Umbelliferae* (12), *Liliaceae* (11), *Scrophulariaceae* (11), and *Caryophyllaceae* (11).

The richest families in terms of number of taxa are *Compositae* (73), *Leguminosae* (67), *Rosaceae* (50), *Cruciferae* (49), *Labiatae* (42), *Gramineae* (38), *Scrophulariaceae* (32), *Ranunculaceae* (32), *Caryophyllaceae* (28), *Boraginaceae* (25), and *Liliaceae* (21).

The richest genera in terms of the number of taxa are *Trifolium* L. (14), *Astragalus* L. (13), *Ranunculus* L. (10), *Veronica* L. (10), *Campanula* L. (10), *Geranium* L. (8) and *Vicia* L. (8).

Endemism was 7.4% and included 57 endemic taxa. The endemism ratio of the study area is very low compared with the average endemism ratio (34.5%) of the Flora of Turkey in volume 11 (Güner et al., 2000). The reasons for the low endemism ratio of the study area may lie in the similarities between Caucasian flora and the studied area.

Pseudomacchie, forest, subalpine, alpine and stream are the main vegetation types in the area (Anşin et al., 2000). Forest vegetation is the most common formation type in this area. In conclusion, the study area is mainly under the influence of a semi-humid climate, which is suitable for growing Euro-Siberian, Euxine, Hyrcano-Euxine and Colchic elements. Pseudomacchie vegetation was distributed throughout the area, especially at altitudes of 200-600 m. There are a few *Pinus pinea* L. (*Pinaceae*) stands distributed sporadically at the junction of the Hatila valley and the Çoruh River named Fıstıklı village (formerly Naşviye). On the other hand, it has been questioned whether *Pinus pinea* L. stands here are natural distribution or plantation. In the stands of *Pinus pinea* L. in Fıstıklı village, many herbaceous and woody plants specifically growing in the Mediterranean region are located in the transition zone between the Euro-Siberian and Mediterranean regions. Anşin et al. (1997) believed that the *Pinus pinea* L. stands had distributed indigenously because of the many other herbaceous and woody Mediterranean taxa. They are as follows: *Trachomitum venetum* (L.) Woodson subsp. *sarmatiense* (Woodson) Avet. (*Apocynaceae*), *Ostrya carpinifolia* Scop. (*Betulaceae*), *Cistus creticus* L., *C. salviifolius* L.

Table 3. Comparison of the 10 families containing the most species in studies conducted in nearby regions.

Families	Number of taxa (%)			
	Present study	Anşin (1979)	Düzenli (1988)	Küçük (1998)
<i>Compositae</i>	9.5	8.9	14.0	10.2
<i>Leguminosae</i>	8.7	8.1	8.1	4.5
<i>Rosaceae</i>	6.5	5.6	6.0	6.8
<i>Cruciferae</i>	6.4	3.6	3.8	2.7
<i>Labiatae</i>	5.5	4.7	4.7	6.0
<i>Gramineae</i>	4.9	4.0	4.9	3.9
<i>Scrophulariaceae</i>	4.2	3.9	3.4	3.7
<i>Caryophyllaceae</i>	3.7	2.9	5.2	2.7
<i>Boraginaceae</i>	3.3	1.9	2.5	2.1
<i>Liliaceae</i>	2.7	2.4	2.0	2.4
Others	44.6	54.1	45.4	55.0

(*Cistaceae*), *Olea europaea* L. var. *sylvestris* (Mill.) Lehr, *Jasminum fruticans* L. (*Oleaceae*), *Cotinus coggygria* Scop., *Rhus coriaria* L. (*Anacardiaceae*), *Silene italica* (L.) Pers. (*Caryophyllaceae*), *Trifolium campestre* Schreb (*Legüminosae*), *Euphorbia paralias* L., *E. peplis* L. (*Euphorbiaceae*), *Erodium malacoides* (L.) L'Hérit. (*Geraniaceae*), *Sideritis montana* L. subsp. *montana* (*Labiatae*). Botanists have been interested in Fıstıklı village because of its rich flora. This richness depends on the climatic variety and geographical structure of the area. Many botanists have studied the flora, vegetation and plant-geography of the surrounding area including, Mirov (1967) and Zohary (1973).

APPENDIX

The sequence of families, genera and species in the following list follows the system adopted in the Flora of Turkey.

PTERIDOPHYTA

EQUISETACEAE

Equisetum hyemale L.

Karadağ hill, streamside, 1555 m, 14.04.1995, ÖE 1100.

E. ramossimum Desf.

Taşlıca village, Kılıçlı, moist meadow, 1750 m, 10.06.1997, ÖE 1831.

E. fluviatile L.

Taşlıca village, Köklü, streamside, 1800 m, 04.06.1997, ÖE 1832.

E. palustre L.

Taşlıca village, Köklü, roadside, moist soil, 1400 m, 13.09.1995, ÖE 1101.

E. arvense L.

Taşlıca village, Kanacık, waste place, 1750 m, 21.05.1997, ÖE 1833.

E. telmateia Ehrh.

Taşlıca village, Köklü, streamside, 1250 m, 10.06.1997, ÖE 1834.

LYCOPODIACEAE

Lycopodium selago L.

Taşlıca village, Bakacak, rocky place, 1200 m, 21.05.1997, ÖE 1835.

L. clavatum L.

Taşlıca village, Arıpınar, shady bank, 1900 m, 02.06.1997, ÖE 1836.

L. alpinum L.

Taşlıca village, Şaşkırat plateau, alpine slope, 2200 m, 10.06.1997, ÖE 1837.

OSMUNDACEAE

Osmunda regalis L.

Cerat hill, open *Picea* Dietr. forest, moist soil, 1250 m, 21.05.1995, ÖE 1102.

ADIANTHACEAE

Adiantum capillus-veneris L.

Taşlıca village, Direkli, stony slope, 1650 m, 12.06.1996, ÖE 1838.

PTERIDACEAE

Pteris cretica L.

Taşlıca village, Arganet, stony slope, 1200 m, 11.07.1996, ÖE 1839.

HYPOLEPIDACEAE

Pteridium aquilinum (L.) Kuhn

Saçinge hill, open forest, roadside, 1950 m, 13.05.1995, ÖE 1103.

Cosm.

THELYPTERIDACEAE

Thelypteris limbosperma (All.) Fuchs

Taşlıca village, Meydanlar, in the *Picea* Dietr. forest, 1400 m, 06.06.1995, ÖE 1104.

ASPLENIACEAE

Asplenium trichomanes L.

Taşlıca village, Gökçeyurt, rocky and stony slope, 970 m, 13.07.1995, ÖE 1106.

A. adiantum-nigrum L.

Hatipoğlu rocky and stony slope, 550 m, 13.07.1995, ÖE 1105.

A. septentrionale (L.) H.Hoffm.

Fıstıklı village, rocky and stony slope, 1930 m, 13.07.1995, ÖE 1107.

Ceterach officinarum DC.

Fıstıklı village, pathside, rocky and stony slope, 300 m, 06.04.1995, ÖE 1108.

Phyllitis scolopendrium (L.) Newman

Taşlıca village, Gölge, open area, stony and moist soil, shady area, 1300 m, 15.07.1995, ÖE 1109.

ATHYRIACEAE

Athrium filix-foemina (L.) Roth

Taşlıca village, Bakacak, along the water channel side, mixed forest, moist soil, 1150 m, 17.05.1995, ÖE 1110.

Cosm.

ASPIDIACEAE

Polystichum lonchitis (L.) Roth

Taşlıca village, Demirci, roadside, rocky and stony slope, 1700 m, 16.08.1995, ÖE 1112.

Dryopteris abbreviata (DC.) Newman

Taşlıca village, Arıpınar, rocky slope, 1800 m, 10.07.1997, ÖE 1840.

D. dilatata (Hoffm.) Gray

Saçinge hill, rocky slope, 1750 m, 08.07.1997, ÖE 1841.

D. lilliana Golitsin

Taşlıca village, Direkli, open area, wet soil, 1600 m, 16.08.1995, ÖE 1111.

VU.

BLECHNACEAE

Blechnum spicant (L.) Roth

Taşlıca village, Demirci, shady bank, 1250 m, 12.07.1997, ÖE 1842.

POLYPODIACEAE

Polypodium vulgare L. subsp. *vulgare*

Taşlıca village, Arganet, roadside, rocky area, 1450 m, 16.05.1995, ÖE 1113.

Cosm.

SPERMATOPHYTA

GYMNOSPERMAE

PINACEAE

Abies nordmanniana (Stev.) Spach subsp. *nordmanniana*

Saçinge hill, mixed forest, 1500 m, 13.07.1995, ÖE 1114, Mount Kurt, mixed forest, 1950 m, 10.06.1996, ÖE 1676,

Eux.

Picea orientalis (L.) Link

Taşlıca village, Gökçeyurt, mixed forest, 650 m, 16.05.1995, ÖE 1677, Taşlıca village, Meydanlar, as pure stand or mixed forest with *Pinus sylvestris* L., *Fagus orientalis* Lipsky, *Abies nordmanniana* (Stev.) Spach, 1300 m, 13.07.1995, ÖE 1115, Şaşkırat plateau, mixed forest, 2250 m, 10.06.1996, ÖE 1678,

Eux.

Pinus sylvestris L.

Taşlıca village, Meydanlar, as pure stand or mixed forest with *Picea orientalis* (L.) Link, *Fagus orientalis* Lipsky, *Abies nordmanniana* (Stev.) Spach, 850 m, 13.07.1995, ÖE 1116, Mount Kurt, mixed forest, 2200 m, 10.06.1996, ÖE 1679,

Euro-Sib.

P. pinea L.

Fıstıklı village, together with shrub species as follow: *Cistus creticus* L., *C. salviifolius* L., *Cotinus coggygria* Scop., *Carpinus orientalis* Miller, *Buxus sempervirens* L., 550 m, 13.07.1995, ÖE 1117,

Medit.

TAXACEAE

Taxus baccata L.

Saçinge hill, solitary in mixed forest, 1000 m, 13.07.1995, ÖE 1118.

CUPRESSACEAE

Juniperus communis L. subsp. *hemisphaerica* (Presl) Nyman

Taşlıca village, Alacadağ, stony slope, 1800 m, 13.07.1995, ÖE 1119.

J. communis L. subsp. *alpina* (Sm.) Celak.

Taşlıca village, Alacadağ, subalpine slope, 2300 m, 16.06.1996, ÖE 1522.

J. oxycedrus L. subsp. *oxycedrus*

Fıstıklı village, rocky and stony slope, 1450 m, macchie, 13.07.1995, ÖE 1120.

J. foetidissima Willd.

Taşlıca village, Gökçeyurt, rocky and stony slope, together with *Quercus* L. and *Carpinus* L., 1200 m, 13.07.1995, ÖE 1121.

EPHEDRACEAE

Ephedra major Host

Çoruh riverside, rocky slope, open area in the mixed forest, together with *Acer* L., *Rhus* L., *Ficus* L., *Paliurus* Mill., 400 m, 13.07.1995, ÖE 1123.

ANGIOSPERMAE

DICOTYLEDONAE

RANUNCULACEAE

Helleborus orientalis Lam.

Fıstıklı village, open forest, 470 m, 04.04.1995, ÖE 1132,

Eux.

Nigella latisecta P.H.Davis

Taşlıca village, Meydanlar, meadow, 1250 m, 12.07.1997, ÖE 1843.

Ir-Tur.

N. segetalis M.Bieb.

Fıstıklı village, roadside, 670 m, 13.06.1995, ÖE 1133.

Trollius ranunculinus (Smith) Stearn

Taşlıca village, Arıpınar, streamside, 1850 m, 17.06.1996, ÖE 1844.

Actaea spicata L.

Saçınge hill, *Picea* Dietr. forest, 1400 m, 13.07.1995, ÖE 1124.

Caltha polypetala Hochst. ex Lorent

Tuzlu hill, streamside, 2800 m, 07.04.1996, ÖE 1128.

Aconitum orientale Mill.

Taşlıca village, Arıpınar, meadow, 1700 m, 21.06.1997, ÖE 1845.

Eux.

A. nasutum Fisch. ex Rchb.

Saçınge hill, streamside, 1800 m, 10.06.1997, ÖE 1846.

Eux.

Delphinium flexuosum M.Bieb.

Taşlıca village, Arıpınar, slope, 1750 m, 13.07.1995, ÖE 1131.

Eux.

Consolida hohenackeri (Boiss.) Grossh.

Fıstıklı village, dry slope, 400 m, 16.07.1997, ÖE 1847

Ir-Tur.

C. orientalis (Gay) Schröd.

Perikaya hill, rocky slope, 1900 m, 18.08.1997, ÖE 1848.

Taşlıca village, Meydanlar, meadow, 1300 m, 23.06.1995, ÖE 1226.

H. transcaucasica Tzvelev

Çoruh: Artvin, 2100 m, Stn. & Hend. 5931.

Erysimum cuspidatum (M.Bieb) DC.

Taşlıca village, Direkli, stony slope, 1500 m, 10.06.1997, ÖE 1880.

Alliaria petiolata (M.Bieb.) Cavara & Grande

Taşlıca village, Meydanlar, open forest, 1150 m, 04.04.1995, ÖE 1206.

Sisymbrium officinale (L.) Scop.

Hatipoğlu, roadside, wet soil, 650 m, 11.03.1996, ÖE 1231.

S. loeselii L.

Taşlıca village, Meydanlar, roadside, 1250 m, 10.06.1997, ÖE 1881.

CAPPARACEAE

Capparis ovata Desf. var. *herbacea* (Willd.) Zohary

Taşlıca village, Çoruh riverside, roadside, 250 m, 16.05.1996, ÖE 1205.

CISTACEAE

Cistus creticus L.

Fıstıklı village, 350 m, 15.04.1996, ÖE 1195.

Omn-Medit.

C. salviifolius L.

Fıstıklı village, *Pinus pinea* L. forest, 370 m, 15.04.1996, ÖE 1196.

Medit.

Helianthemum nummularium (L.) Mill. subsp. *tomentosum* (Scop.) Schinz & Thell.

Fıstıklı village, stony and rocky slope, 700 m, 03.05.1995, ÖE 1197.

H. nummularium (L.) Mill. subsp. *ovatum* Viv.

Taşlıca village, Meydanlar, stony and rocky slope, 1300 m, 21.08.1995, ÖE 1198.

Fumana arabica (L.) Spach var. *arabica*

Taşlıca village, Direkli, mixed forest, 1450 m, 20.07.1997, ÖE 1882.

VIOLACEAE

Viola odorata L.

Taşlıca village, Meydanlar, moist soil, shady area, 1250 m, 15.04.1995, ÖE 1191.

Cosm.

V. suavis M.Bieb.

Fıstıklı village, open forest, 740 m, 15.04.1996, ÖE 1194.

V. alba Besser

Taşlıca village, Demirci, open forest, 1540 m, 13.04.1996, ÖE 1187.

V. sieheana Becker

Taşlıca village, Demirci, stony slope, 1350 m, 12.05.1995, ÖE 1193.

V. canina L.

Fıstıklı village, roadside, 470 m, 15.04.1996, ÖE 1192.

V. altaica Ker Gawl. subsp. *oreades* (M.Bieb.) Becker

Tuzlu hill, alpine slope, 2900 m, 14.05.1996, ÖE 1189.

V. kitaibeliana Roem. & Schult.

Fıstıklı village, fieldside, 550 m, 14.05.1996, ÖE 1190.

V. arvensis Murray

Taşlıca village, Demirci, meadow, 1400 m, 06.06.1997, ÖE 1883.

POLYGALACEAE

Polygala supina Schreb.

Saçinge hill, open area, stony slope, 1850 m, 17.05.1995, ÖE 1396.

P. pruinosa Boiss. subsp. *pruinosa*

Fıstıklı village, open area, slope, 570 m, 07.05.1995, ÖE 1395.

P. major Jacq.

Taşlıca village, Meydanlar, stony slope, 900-1350 m, 07.05.1995, ÖE 1394.

Euro-Sib.

P. anatolica Boiss. & Heldr.

Fıstıklı village, slope, 450 m, 17.05.1995, ÖE 1393.

P. vulgaris L.

Taşlıca village, Meydanlar, open forest, 1300 m, 07.05.1995, ÖE 1397.

Euro-Sib.

CARYOPHYLLACEAE

Arenaria rotundifolia M.Bieb. subsp. **rotundifolia**

Taşlıca village, Bakacak, meadow, 1350 m, 12.08.1995, ÖE 1593.

A. pseudacantholimon Bornm.

Tuzlu hill, alpine slope, 2600 m, 06.06.1997, ÖE 1884.

Endemic, LR (lc), Ir-Tur.

A. armeniaca Boiss.

Taşlıca village, Arıpınar, dry rocky slope, 1700 m, 16.06.1997, ÖE 1885.

Endemic, LR (lc), Ir-Tur.

Minuartia imbricata (M.Bieb) Woronow

Tuzlu hill, rocky-stony slope, 2750 m, 10.06.1997, ÖE 1886.

Eux (mt).

M. aizoides (Boiss.) Bornm.

Taşlıca village, Gökçeyurt, roadside, damp places, 1200 m, 10.06.1994, ÖE 1674.

M. circassica (Albow) Woron.

Perikaya hill, alpine slope, 2050 m, 06.06.1997, ÖE 1887.

Eux (mt).

Stellaria media (L.) Vill. subsp. **media**

Fıstıklı village, Hatila streamside, 470 m, 14.04.1996, ÖE 1175.

S. holostea L.

Taşlıca village, Arıpınar, slope, 1850 m, 12.07.1997, ÖE 1888.

Euro-Sib.

Myosoton aquaticum (L.) Moench

Fıstıklı village, streamside, moist soil, 400 m, 15.05.1996, ÖE 1167.

Euro-Sib.

Cerastium cerastioides (L.) Britt.

Taşlıca village, Bakacak, meadow, 1250 m, 12.08.1995, ÖE 1595.

C. armeniacum Gren.

Saçıngé hill, slope, 1750 m, 10.06.1997, ÖE 1889.

Endemic, LR (lc).

C. chlorifolium Fisch. & Mey.

Taşlıca village, Arıpınar, meadow, 1550 m, 10.07.1997, ÖE 1890.

C. gnaphalodes Fenzl

Tuzlu hill, slope, 2700 m, 24.08.1997, ÖE 1891.

Endemic, LR (lc).

C. glomeratum Thuill.

Fıstıklı village, slope, 600 m, 28.04.1997, ÖE 1892.

Cosm.

Sagina procumbens L.

Mount Otluca, waste place, 2200 m, 20.07.1997, ÖE 1893.

Dianthus floribundus Boiss.

Taşlıca village, Direkli, roadside, 1600 m, 16.08.1995, ÖE 1166.

Ir-Tur.

D. crinitus Sm. var. **crinitus**

Taşlıca village, Bakacak, rocky and dry soil, 800 m, 13.07.1995, ÖE 1165.

Taşlıca village, Şaşkırat plateau, subalpine slope, 2100 m, 11.06.1995, ÖE 1178.

R. caucasicus Rech

Mount Keçi, slope, 1900 m, 12.08.1997, ÖE 1897.

R. crispus L.

Taşlıca village, Köklü, meadow, 1450 m, 10.06.1997, ÖE 1898.

CHENOPODIACEAE

Chenopodium foliosum (Moench) Asch.

Fıstıklı village, roadside, 450 m, 10.06.1997, ÖE 1899.

PHYTOLACCACEAE

Phytolacca americana L.

Fıstıklı village, roadside, 530 m, 13.07.1995, ÖE 1162.

Cosm.

TAMARICACEAE

Tamarix tetrandra Pall. ex M.Bieb.

Çoruh riverside, 350 m, 07.10.1995, ÖE 1199.

T. smyrnensis Bunge

Çoruh riverside, 170 m, 10.06.1997, ÖE 1900.

GUTTIFERAE

Hypericum androsaemum L.

Taşlıca village, Meydanlar, roadside, streamside, 1300 m, 13.07.1995, ÖE 1179, Fıstıklı village, streamside, 370 m, 15.06.1996, ÖE 1180.

Euro-Sib.

H. bupleuroides Gris.

Taşlıca village, Davütet, open area in mixed forest, moist soil, 1300 m, 11.08.1995, ÖE 1182.

Eux.

H. montanum L.

Tuzlu hill, stony slope, 2250 m, 20.07.1997, ÖE 1901.

Euro-Sib.

H. bithynicum Boiss.

Taşlıca village, Gölge, moist soil, 750 m, 21.08.1995, ÖE 1181.

Eux.

H. orientale L.

Taşlıca village, Şaşkırat plateau, subalpine slope, 2200 m, 17.06.1995, ÖE 1183, Arıpınar, roadside, 1650 m, 11.05.1996, ÖE 1675.

H. perforatum L.

Saçıne hill, open forest, wet soil, 1900 m, 03.08.1995, ÖE 1184.

MALVACEAE

Malva sylvestris L.

Taşlıca village, Bakacak, roadside, 1400 m, 17.06.1995, ÖE 1598.

Alcea hohenackeri (Boiss. & Huet) Boiss.

Taşlıca village, Direkli, roadside, open forest, 1450 m, 21.07.1995, ÖE 1186.

A. calvertii (Boiss.) Boiss.

Taşlıca village, Arıpınar, rocky slope, 1600 m, 20.07.1997, ÖE 1902.

Endemic, LR (Ic), Ir-Tur.

A. excubita Iljin

Taşlıca village, Bakacak, roadside, 1450 m, 17.06.1995, ÖE 1599.

Althaea cannabina L.

Taşlıca village, Meydanlar, meadow, 1300 m, 16.07.1996, ÖE 1600.

TILIACEAE

Tilia rubra DC. subsp. *caucasica* (Rupr.) V.Engl.

Saçıne hill, roadside, mixed forest, 1320 m, 12.08.1995, 10549, ÖE 1185.

Eux.

LINACEAE

Linum aroanium Boiss. & Orph.

Taşlıca village, Meydanlar, stony slope, 1300 m, 07.05.1995, ÖE 1390.

L. bienne Mill.

Fıstıklı village, fieldside, 550 m, 07.05.1995, ÖE 1391.

Medit.

L. catharticum L.

Taşlıca village, Arıpınar, stony slope, 1750 m, 16.07.1995, ÖE 1392.

Euro-Sib.

GERANIACEAE

Geranium lucidum L.

Hatipoğlu, *Picea* Dietr. forest side, 450 m, 14.03.1996, ÖE 1381.

G. purpureum Vill.

Taşlıca village, Gölge, rocky and stony slope, 1000 m, 18.07.1995, ÖE 1386.

G. robertianum L.

Taşlıca village, Bakacak, open forest, 1025 m, 21.06.1995, ÖE 1387.

G. molle L. subsp. *molle*

Fıstıklı village, fieldside, 500 m, 13.03.1995, ÖE 1382.

G. psilostemon Ledeb.

Taşlıca village, Konacık, *Picea* Dietr. forest, 1950 m, 21.06.1995, ÖE 1385.

Eux.

G. sylvaticum L.

Taşlıca village, Arıpınar, mixed forest, 1950 m, 18.07.1995, ÖE 1388.

Mount Otluca, rocky slope, 2050 m, 18.07.1997, ÖE 1942.

Endemic, LR (lc), Ir-Tur.

Tragopogon reticulatus Boiss. & Huet

Fıstıklı village, open area, stony slope, 560 m, 15.06.1995, ÖE 1552.

T. aureus Boiss.

Taşlıca village, Arıpınar, open area, subalpine slope, 2100 m, 17.06.1995, ÖE 1553

Endemic, LR(lc).

Leontodon asperimus (Willd.) Ball.

Fıstıklı village, grassy slope, 560 m, 17.07.1995, ÖE 1536.

L. crispus Vill. subsp. *asper* (Waldst. & Kit.) Röhl. var. *asper*

Taşlıca village, Gökçeyurt, rocky slope, 1200 m, 10.08.1996, ÖE 1633.

Sonchus asper (L.) hill subsp. *glaucescens* (Jord.) Ball.

Cerat hill, open woods, 1600 m, 17.04.1996, ÖE 1634.

Hieracium variegatisguamum (Zahn) Juxip

Taşlıca village, Demirci, mixed forest, 1600 m, 28.06.1997, ÖE 1943.

Endemic, DD, Eux.

H. subhastulatum (Zahn) Juxip

Tuzlu hill, alpine pasture, 2800 m, 20.07.1997, ÖE 1944.

Endemic, DD, Eux.

H. diaphanoidiceps (Woronow & Zahn) Juxip

Artvin:inter Selalet et Chinzart ad margines sylvae, Woronow.

Endemic, EN, Eux.

H. bornmuelleri Freyn

Mount Otluca, rocky place, 2000 m, 10.08.1997, ÖE 1945.

Endemic, LR (lc).

H. subrosulatum Freyn & Sint.

Taşlıca village, Meydanlar, roadside, 1230 m, 08.08.1995, ÖE 1533.

Endemic, DD.

H. artvinense (Woronow & Zahn) Juxip
Artvin, in pineto supra Ghurdzan, Woronow.

Endemic, DD, Eux.

H. subartvinense Juxip

Artvin, prope stationem Gurdshani, 26.07.1911, Woronow.

Endemic, DD, Eux.

Pilosella x ruprechtii (Boiss.) Sell & West

Taşlıca village, Gölgeci, rocky slope, 1600 m, 12.08.1996, ÖE 1635.

P. piloselloides (Vill.) Soják subsp. *megalomastix* (NP.) Sell & West

Taşlıca village, Demirci, open area, slope, 1560 m, 13.07.1995, ÖE 1541.

Prenanthes abietina (Boiss. & Ball.) Kirp.

Taşlıca village, Direkli, mixed forest, 1850 m, 17.09.1995, ÖE 1542.

Eux.

P. cacaliifolia (M.Bieb.) Beauverd

Cerat hill, mixed forest, 1780 m, 10.10.1997, ÖE 1946.

Eux.

Mycelis muralis (L.) Dum.

Taşlıca village, Bakacak, open forest, 1230 m, 13.07.1995, ÖE 1538.

Euro-Sib.

Lapsana communis L. subsp. *intermedia* (M.Bieb.) Hayek

Taşlıca village, Meydanlar, mixed forest, 1370 m, 17.07.1995, ÖE 1535.

Taraxacum buttleri Soest

Taşlıca village, Meydanlar, rocky and stony slope, 1100 m, 12.06.1995, ÖE 1550.

Crepis paludosa (L.) Moench

Taşlıca village, Kılıçlı, open forest, 1700 m, 05.07.1995, ÖE 1526.

Euro-Sib.

CAMPANULACEAE

Campanula latifolia L.

Perikaya hill, slope, 1800 m, 10.06.1997, ÖE 1947.
