SCOPE OF JOURNAL

- The Turkish Journal of Earth Sciences is published electronically 6 times a year by the Scientific and Technological Research Council of Turkey (TÜBİTAK).
- It is an international English-language journal for the publication of significant original recent research in a wide spectrum of topics in the earth sciences, such as geology, structural geology, tectonics, sedimentology, geochemistry, geochronology, palaeontology, igneous and metamorphic petrology, mineralogy, biostratigraphy, geophysics, geomorphology, palaeoecology and oceanography, and mineral-deposits.
- The journal publishes the highest quality papers and comprehensive review papers on hot topics of current interest, with high quality illustrations.
- Submitted papers should have regional implications and attract international interest as the journal aims to provide a medium for interdisciplinary papers that would be of interest to many different specialists.
- Specialized papers can be submitted if they illustrate significant progress in that specific area of the earth sciences. In addition to original and review articles, we are also interested in publishing discussions of papers that have already appeared in recent issues of the journal.
- The journal also publishes thematic sets of papers on topical aspects of geology or special issues of selected papers from conferences.
- Short articles (6 printed pages maximum) for rapid publication reporting a significant advance in the earth sciences with regional impact are welcome. Contribution is open to researchers of all nationalities.

CONTENTS

GPS-derived source parameters of the 2014 North Aegean earthquake (Mw 6.9) 661 Aslı DOĞRU, Bahadır AKTUĞ, Fatih BULUT, Haluk ÖZENER	661
Plio-Quaternary stress states along the Kütahya Fault and surroundings, NW Turkey 671 Elif AKGÜN, Süha ÖZDEN	671
New insights on Messinian evaporites based on field and seismic interpretations in the Neogene Antalya Basin, SW Turkey 687 Saliha DÜNDAR, Baki VAROL	687
Comparison of stable isotope values of Quaternary calcretes from Adana and Mersin provinces: implications on controlling factors 706 Muhsin EREN, Meryem YEŞİLOT KAPLAN, Selahattin KADİR, Selim KAPUR	706
Convergence-aligned foreland magmatism in the Arabia–Anatolia Collision: geochronological evidence from the Karacadağ Volcanic Complex, south-east Turkey 719 Taner EKİCİ, Colin G. MACPHERSON	719
The geochemical signatures of the Silurian–Devonian succession in eastern Saudi Arabia 734 Mohamed SOUA	734
The mineralogical and geochemical composition of Holocene sediments from Lake Hazar, Elazığ, Eastern Turkey: implications for weathering, paleoclimate, redox conditions, provenance, and tectonic setting 760 Dicle BAL AKKOCA, K. Kadir ERİŞ, M. Namık ÇAĞATAY, Demet BİLTEKİN	760
