SCOPE OF JOURNAL

- The Turkish Journal of Earth Sciences is published electronically 6 times a year by the Scientific and Technological Research Council of Turkey (TÜBİTAK).
- It is an international English-language journal for the publication of significant original recent research in a wide spectrum of topics in the earth sciences, such as geology, structural geology, tectonics, sedimentology, geochemistry, geochronology, palaeontology, igneous and metamorphic petrology, mineralogy, biostratigraphy, geophysics, geomorphology, palaeoecology and oceanography, and mineral-deposits.
- The journal publishes the highest quality papers and comprehensive review papers on hot topics of current interest, with high quality illustrations.
- Submitted papers should have regional implications and attract international interest as the journal aims to provide a medium for interdisciplinary papers that would be of interest to many different specialists.
- Specialized papers can be submitted if they illustrate significant progress in that specific area of the earth sciences. In addition to original and review articles, we are also interested in publishing discussions of papers that have already appeared in recent issues of the journal.
- The journal also publishes thematic sets of papers on topical aspects of geology or special issues of selected papers from conferences.
- Short articles (6 printed pages maximum) for rapid publication reporting a significant advance in the earth sciences with regional impact are welcome. Contribution is open to researchers of all nationalities.

CONTENTS

Late Quaternary landscape evolution of the southern Marmara region: paleogeographic implications for settlements, NW Turkey	479
Nizamettin KAZANCI, Zeynep ERGUN, Kaan İREN, Suzanne A.G. LEROY, Sonay BOYRAZ ARSLAN, Salim ÖNCEL, Koray KOÇ, Alper GÜRBÜZ	
Small benthic foraminiferal biostratigraphy and palaeoecology during the Campanian-Maastrichtian transition in north-western Tunisia	500
Abdellatif BEJAOUİ, Ezzedine SAİDİ, Dalila ZAGHBİB-TURKİ	
Deep Structure of Central Menderes Massif: data from deep geothermal wells.....	531
Fatma GÜLMEZ, Emre DAMCI, Umut Barış ÜLGEN, Aral OKAY	
Structure of the Büyük Menderes Graben systems from gravity anomalies	544
Emre TİMUR, İlknur KAFTAN, Coşkun SARI, Müjgan ŞALK	
Petrological characteristics of the Middle Eocene Toveireh pluton (southwest of Jandaq, central Iran): implications for the eastern branch of the Neo-Tethys subduction.....	558
Masumeh SARGAZI, Ghodrat TORABI, Tomoaki MORISHITA	
The Early Eocene Ekmekçi granodiorite porphyry in the Karacabey region (Sakarya Zone, NW Turkey).....	589
Gürsel SUNAL, Mehmet Korhan ERTURAÇ, Gültekin TOPUZ, Aral I. OKAY, Thomas ZACK	
Petrography, geochemistry, and provenance of Jurassic sandstones from the Sakarya Zone, NW Turkey.....	603
Fırat ŞENGÜN, Osman Ersin KORALAY	
Geology, fluid inclusion, and stable isotope (O, H, S, C) characteristics of the Hazinemağara (Gümüşhane) lead-zinc deposit, NE Turkey	623
Esra ÜNAL ÇAKIR, Ahmet GÖKÇE	
Estimating the location of a causative body from a self-potential anomaly using 2D and 3D normalized full gradient and Euler deconvolution.....	640
Petek SINDIRGI, Şenol ÖZYALIN
