**RETRACTED: Prevalence and antimicrobial susceptibility pattern of toxigenic Clostridium difficilestrains isolated in Iran**

As stated in our publication policy, the Editors-in-Chief of the journals have the right to return or retract articles even if articles have been accepted or published in order to increase the authenticity and reliability and to prevent ethical breaches. In this respect, it has been found that the article below contains many scientific errors in its findings.

Ensuring that the studies published in our journals are conducted in a fair and ethical manner is one of our major missions. Therefore, to correct the literature and ensure its integrity, the article below is retracted.
